

Advanced Kegel Exercises Guide

1. Kegels with Bridge Pose (Pelvic Lift)

Lie on your back with knees bent, feet flat. Squeeze your pelvic floor muscles and lift your hips into a bridge. Hold for 5-10 seconds, then relax. Reps: 10-15, 2 sets.

2. Standing Kegels

Stand with feet hip-width apart. Contract pelvic floor muscles as if stopping urine. Hold for 5-10 seconds, then relax. Useful for real-life functional strength.

3. Kegel Elevator

Imagine your pelvic muscles rising floor by floor: Floor 1 (light squeeze), Floor 2 (medium), Floor 3 (full squeeze). Hold at each level, then descend slowly.

4. Seated Kegels on an Exercise Ball

Sit upright on a stability ball. Perform Kegels while maintaining posture. Engages core and improves deep muscle control.

5. Bird Dog with Kegel Activation

On all fours, extend one arm and opposite leg. Engage pelvic muscles while holding for 5-10 seconds. Switch sides. Enhances pelvic and spinal stability.

6. Endurance Kegels

Contract your pelvic floor and hold for 20-60 seconds. Focus on steady breathing. Rest double the duration. Builds muscle endurance.

Sample Daily Routine

- Slow Kegels: 2 sets of 10 (5-10s hold)
- Quick Flicks: 2 sets of 10
- Kegel Elevator: 1-2 rounds
- Bridge with Kegel: 2 sets of 10

Advanced Kegel Exercises Guide

- Seated Ball Kegels: 2 sets of 10
- Bird Dog with Kegels: 1 set each side (5 reps)
- Endurance Hold: 1 rep (20-60s)
